TO WHOM IT MAY CONCERN:

Dr. Mendes was an advanced level student in a comprehensive course I teach on writing CME. He graduated with commendation.

I hired Dr. Mendes to work on a case-based CME project on osteoporosis. His familiarity with the current literature and guidelines is excellent. He was able to easily synthesize a large amount of clinical information into a succinct summary using a case-based format. His writing is very good and his manner, professional. He is a pleasure to work with—he is both observant to deadlines and quick to respond to contact from clients. I highly recommend him and plan to use his services in the future.
